1. Introduction

The purpose of this documentation is to define how information related to transactions in a multiple credit advice message should be exchanged electronically between Nets and the Bank Customer/Bank.

This documentation must be read in conjunction with three other documents:

- Remittance information for PAYMUL, CREMUL and DEBMUL.
This document covers segment groups 20, 21, 22, 23 and 27 in CREMUL
- egiro Credit Payment Plus Specification, latest version
- "Nets Tjenestepesifikasjon egiro innbetaling", latest version

2. References

This chapter contains references to documents relevant for this IG:

- [1] egiro Credit Payment Plus Specification and "Nets Tjenestepesifikasjon egiro innbetaling", latest versions.
- [2] CREMUL Implementation Guideline from Bankenes Standardiseringskontor, version 2.1 dated May 1999. (Norwegian title: CREMUL MELDINGSHÅNDBOK, VERSJON 2.12, Mars 2004)

This guideline is in norwegian. It is based on:

- UN/EDIFACT directory D.96A. UN/ECE, March 1996. UNTDID, UN/ECE Geneva,19951117
- plus some codes from directory D.97A
- UN/EDIFACT standard message, multiple credit advice message - CREMUL, dated 1995.11.23, based on UN/EDIFACT UNTDID D.96A.

2.1 Precedence rules

In case of conflict between the Guideline from Bankenes Standardiseringskontor and this document, the following precedent rules applies:

1. CREMUL Implementation Guideline from Bankenes Standardiseringskontor (norwegian language)
2. Implementation Guideline for Multiple Credit Advice Message [this document]

Implying that the CREMUL Implementation Guideline from Bankenes Standardiseringskontor will overrule this IG in case of conflict. The reason is that this Implementation Guideline is a subset of the Implementation Guideline from Bankenes Standardiseringskontor.

3. Quality management

This documentation has been reviewed and approved by bank and pilot customer.

4. Multiple Credit Advice Message - area of use

As defined by this IG the main function of the CREMUL - Multiple Credit Advice Message, is as follows :

A Multiple Credit Advice Message is sent by Nets to the Bank Customer, who has agreed bilaterally in advance, that their account (s) has been or will be credited for specified amount(s) on the date(s) indicated, in settlement of the referenced business transaction(s).

4.1 Principles for use

The scope of implementing the CREMUL message between Nets and the Bank Customer/Bank is:

- For the egiro Credit Payment Service: To receive all credit transactions processed in Nets with a value date
- For the egiro Credit Payment Plus Service: To receive all credit transactions processed in Nets and the bank with a value date and a posting date

The credit transactions will be delivered in following transaction groups:

1. Total amount with valid KID on level B and underlying single transactions on level C
2. Total amount with invalid KID on level B and underlying single transactions on level C
3. Total amount with autogiro on level B and underlying single transactions on level C
4. Total amount with electronic payments on level B and underlying single transactions on level C
5. Total amount with giro notes on level B and underlying single transactions on level C
6. Total amount with structured information on level B and underlying single transactions on level C
7. Single bank internal transactions (Same on level B and C)

The transactions groups are stated in the BUS (Business function) segment in Group 4.

Transaction group 1-5 covers all credit transactions cleared in Nets for the beneficiary.

If the single transactions in a group exceed 9999 transactions (that is underlying single transactions), a new group will be created.

Transaction group 6 covers all credit transactions cleared outside Nets for the beneficiary and is supplemented from the bank. **(only available in egiro Credit Payment Plus Service)**

Booking (posting) will be done on the total amounts (level B). Booked amounts on the credit account will be identical to the amount stated in the MOA (monetary amount) Segment in Group 4.

In egiro Credit Payment Service the qualifier that will be used is 349 (amount that will be posted).

In egiro Credit Payment Plus Service the qualifier that will be used is 60 (final posted amount).

4.2 Conditions

This chapter contains some conditions which are fundamental for the specification of this IG. These conditions will both affect preparation of outgoing messages and the processing of incoming messages:

Security

See "Nets Tjenestepesifikasjon egiro innbetaling" latest version and egiro Credit Payment Plus Specification, latest version.

Cancellation

All Credit Advices sent to the Bank Customer contains only amounts to be posted or final amounts to be posted. It is therefore not possible to cancel a CREMUL.

Service-segments related to the exchange.

The service-segments related to the exchange are described in detail in the mentioned Specifications, latest versions, and is not part of this IG. The following service-segments are relevant to the exchange: UNA, UNB and UNZ.

5. Segment table

The segment table below, list all segment groups and segments that are included in the CREMUL message. Segments and groups that are used according to this IG, are listed using the bold attribute. Other segments and groups (in normal writing) are not to be used.

Notation in the segment table

- Pos Position number on item (Segment group or segment) in message.
- Tag Segment tag
- Name: Segment name or segment group number, according to message definition [4].
- S Segment or segment group status, according to message definition[4].
- ReptThe maximum number of legal representation of a segment or a segment group, according to message definition [4].

6. Specification of segments and segment groups

LEVEL A

UNH Message header (M 1)

Function: A service segment starting and uniquely identifying a message. The message type code for the Multiple credit advice message is CREMUL. Note: Multiple Credit Advice Messages conforming to this document must contain the following data in segment UNH, composite S009: Data element 0065=CREMUL, 0052=D, 0054=96A, 0051=UN.

	Tag	Name	Status	Repr.	Description
010	0062	MESSAGE REFERENCE NUMBER	M	an..14	(Number of each CREMUL in the interchange)
020	S009	MESSAGE IDENTIFIER	M		
	0065	Message type identifier	M	an..6	CREMUL
	0052	Message version number	M	an..3	D
	0054	Message release number	M	an..3	96A
	0051	Controlling agency	M	an..2	UN
	0057	Association assigned code	C	an..6	Shall not be used
030	0068	COMMON ACCESS REFERENCE	C	an..35	Shall not be used
040	S010	STATUS OF THE TRANSFER	C		Shall not be used
	0070	Sequence of transfers	M	n..2	Shall not be used
	0073	First/last sequence message transfer indication	C	a1	Shall not be used

Example: UNH+1+CREMUL:D:96A:UN'

BGM Beginning of message (M 1)

Function: A segment by means of which the sender must uniquely identify the CREMUL message using its type and number and its function. It is an information of items advised in advance, of items pending to be booked or of items which have been booked.

Use: **Code 435 (Multiple preadvice of a credit) in data element 1001 is used in egiro Credit Payment Service**

Code 455 (Extended credit advice - multiple credit advice) in data element 1001 is used in egiro Credit Payment Plus Service

	Tag	Name	Status	Repr.	Description
010	C002	DOCUMENT/MESSAGE NAME	C

	2379	Date/time/period format qualifier	C	an..3	102 (CCYYMMDD) 203 (CCYYMMDDHHMM)

Example: DTM+137:19970303:102'
DTM+137:200003031208:203'

Group 3 (C3)

Function: A group of segments identifying the name and address of non-financial parties involved in the message, their function and their contacts.

Gr/Sgm	Name	Status	Repr.	Description
NAD	Name and address	M	1	
CTA	Contact information	C	1	Shall not be used
COM	Communication contact	C	5	Shall not be used

NAD Name and address (M1)

Function: A segment identifying the names and addresses of the parties associated with the exchange of the message, in coded or uncoded form, and their function.

	Tag	Name	Status	Repr.	Description
010	3035	PARTY QUALIFIER	M	an..3	MR (Beneficiary)
020	C082	PARTY IDENTIFICATION DETAILS	C
