White Label Wallet Service
Mobile payments made easy and secure
For Acceptance & Payment (AP) Card Technology
supporting Bluetooth and QR

EASY DEPLOYMENT

White label wallet service and payment acceptance networks in place for easy integration with your core systems. Roll-out of wallet available through App Store/Google Play.

REACH

50+ banks already on board. Scheme independent solution for latest iOS hand-sets. Existing international terminal and acceptance payment networks ready for mobile payments via QR or BLE.

EASY AND SECURE PAYMENTS

Advanced point-of-sale experience. Complete solution and payment acceptance networks based on EMVCo security in addition to PCI DSS and PCI CPP compliance and control standards.

As consumers become increasingly 'mobile', they are demanding greater convenience and efficiency from their devices and mobile services. As a result, smartphone enabled mobile payments are fast becoming an integral component in their day-to-day lives. Nordic consumers are early adopters of mobile services, and Nets predicts that by 2020, more than half of all payments will be mobile.

- Fast entry to market to provide a mobile payment solution for consumers.

- Includes all necessary features and payment flows in accordance with card scheme requirements and industry standards.

- Advanced user Interface allows your customers to manage, select and pay with cards issued to the wallet.

- Customer branding available according to customer preferences for colour, scheme, icons, wallet name and logo.

YOUR FAST-TRACK TO PROVIDING YOUR CUSTOMERS WITH YOUR OWN BRANDED MOBILE PAYMENT APP

Nets' white label wallet service offers a fast time to market based on an already implemented, certifiable and fully integrated application.

THIS AP BASED MOBILE PAYMENT SOLUTION HAS BEEN DEVELOPED USING:

- Bluetooth Low Energy (BLE) and QR code acceptance.

- Tokenisation to secure card details.

- Strong cardholder identification and authentication security.

- International scheme requirements.

- Contactless card payments.

- International adopted payment acceptance networks and terminals.

The solution is based upon existing secure and stable payment acceptance network technology, ensuring interoperability with the current contactless acceptance network technologies linking banks and merchants together – offering your customers a simple, secure and seamless mobile payment experience.

In addition, the solution is built to encompass new payment providers as well as accommodate additional value added services – helping you to stay at the forefront of mobile innovation with a solution that is ready for the future of mobile payments.

Product Features and Benefits

- The white label wallet service is a fully
  featured mobile payment application branded
  according to customer requirements.

- The white label wallet service enables your
  customers to virtualise payment cards to the
  wallet, manage those payment cards and in-
  itiate mobile payments using the virtualised
  payment cards.

- The white label wallet service provides a
  mobile payment app based on internationally
  adopted payment acceptance networks and
  terminal readiness (using standard contact-
  less interface).

The ability to brand the wallet increases
touch-points with your customers, strength-
ens your relationships with your customers
and helps to ensure customer retention.

As an end-to-end managed solution, our white
label wallet service allows you to focus on your
core services, and go to market without the
logistical complexities of developing your own
solution.

The white label wallet service is based on
EMVCo security in addition to PCI DSS and PCI
CPP compliance and control standards.

Technical Details

- Based on EMVCo standards. Sensitive data
  is handled using Nets' Token Service solu-
  tion. The tokenisation network ensures that
  data is protected by strong physical and
  logical security measures in accordance with
  industry standards.

- Support for IOS version 10 and later.

- Supports all languages including Swedish,
  Norwegian, Finnish, Danish and English. The
  applied language will be set according to

your customers' phone language settings.

- Configurable branding choices (colour theme
  and icon set) and relevant objects (wallet
  provider name, wallet provider logo) are
  determined and supplied by you.

- 24/7 availability.
