Netaxept Advanced

Netaxept is a reliable and smooth payment solution for distance selling. With the service package options of Netaxept, you can receive payments from distance selling with your desired payment methods and customise the whole payment process easily and safely to meet the specific needs of your company.

As a PCI DSS certified payment solution, Netaxept fulfils the high data security standards set for payments over the Internet. Payment security is enhanced by the misuse prevention services offered by Netaxept and the Verified by Visa and MasterCard SecureCode authentication services.

The "Netaxept Advanced" service package is targeted to companies that want a comprehensive and versatile payment solution for their online store. Payment solution can easily be integrated into other systems in your company by using various interface options and the additional services of Netaxept.

FEATURES

- Visa and MasterCard (debit and credit), Visa Electron, Maestro, American Express and Diners Club card payments, bank payment buttons, Klarna and Paypal
- Option to pay using several currencies
- Option to customise the payment form for web and mobile environments
- Comprehensive payment transaction reporting service
- Payment with a link sent to the buyer (link payment)
- Misuse prevention services that reduce risks in distance selling
- Verified by Visa and MasterCard SecureCode authentication services that increase safety in e-commerce
- Easy to use user interface where payment transactions can be processed further, for example credit
- Testing credentials and test cards free of charge

ADDITIONAL SERVICES

- Easy payment where payment can be made with one click
- Recurring payment where a merchant can make subsequent debits without input from the buyer
- Risk management tools that enable reliable and efficient prevention of card misuse

To start using the "Netaxept Advanced" service package in your company, fill in a Netaxept agreement and submit it to Nets. Agree on the settlement method, schedule and other payment traffic related issues with your acquirer or payment service provider.
