Netaxept Call Centre

Netaxept is a reliable and smooth payment solution for distance selling. With the service package options of Netaxept, you can receive payments from distance selling with your desired payment methods and customise the whole payment process easily and safely to meet the specific needs of your company.

As a PCI DSS certified payment solution, Netaxept fulfils the high data security standards set for payments over the Internet. Payment security is enhanced by the misuse prevention services offered by Netaxept and payment card verification code.

The "Netaxept Call Centre" service package is targeted to companies that sell products or services via telephone and mail order sales. Payment authorisations and debits and possible credits can be managed easily via an easy to use user interface. If you wish, you can easily integrate payment solution into other systems in your company using the various interface options of Netaxept.

To start using the "Netaxept Call Centre" service package in your company, fill in a Netaxept agreement and submit it to Nets. Agree on the settlement method, schedule and other payment traffic related issues with your acquirer or payment service provider.

FEATURES

- Visa and MasterCard (debit and credit), Visa Electron, Maestro, American Express and Diners Club card payments
